

Name : Pooja Bunga Pitriana
 Internship Placement : PT. Dairygold Indonesia

WEEKLY ACTIVITY SUMMARY

17-Week Quality Control Internship Timeline

Week	Rotation	Activity
1	Physicochemical Laboratory	Laboratory orientation, sample preparation, moisture and pH analysis, FFA analysis, meltability testing, raw material testing, and keeping product.
2	Microbiology Laboratory	Media preparation, microbiological testing, environmental swab activities, data recording, CoA preparation, and laboratory inventory support.
3	Production Line (In Line)	In-process quality control, moisture, pH and salt testing, packaging inspection, and production quality documentation.
4	Physicochemical Laboratory	Routine physicochemical analysis, product verification, organoleptic evaluation, packaging inspection, and laboratory documentation.
5	Microbiology Laboratory & In Line	Microbiological analysis, media preparation, laboratory documentation, and support for in-line quality control activities.
6	Production Line (In Line)	Routine in-process quality testing, packaging inspection, product monitoring, and analytical support.
7	Physicochemical Laboratory	Physicochemical testing, raw material analysis, organoleptic evaluation, and laboratory documentation.
8	Microbiology Laboratory & In Line	Microbiological testing, environmental monitoring, laboratory documentation, and production quality support.
9	Production Line (In Line)	Routine product quality inspection, packaging inspection, and process documentation.
10	Physicochemical Laboratory	Routine laboratory testing, inventory checking, product verification, and quality documentation.
11	Microbiology Laboratory & Office	Microbiological testing, laboratory documentation, CoA preparation, and administrative support.
12	Production Line (In Line)	In-process quality testing, packaging inspection, and production monitoring.
13	Physicochemical Laboratory	Routine laboratory testing, product monitoring, sample preparation, and documentation.
14	Microbiology Laboratory & Office	Environmental monitoring, microbiological testing, laboratory documentation, and administrative support.
15	Production Line (In Line)	Routine in-line quality testing, packaging inspection, and process documentation.
16	Physicochemical Laboratory	Laboratory testing, physicochemical analysis, product monitoring, and documentation.
17	Microbiology Laboratory & Office	Final microbiological activities, quality documentation, administrative support, and internship completion.
